To showcase my passion for Strava, I created Strava art, running a route that spelled out, “Strava”. Over the past couple of years, I’ve used Strava to track my runs, hikes, and skiing adventures. Strava has helped me train for half marathons, 10K races, and it’s even my go-to platform for sharing my photography!

I’m an engineering student at the University of Waterloo with internship experience in software development, specializing in Machine Learning and Cloud Infrastructure, I’ve built and deployed scalable systems using AWS, Docker, Kubernetes, and have a strong foundation in ML algorithms and AI solutions.

Below are a few photos on my Strava feed that I captured on hikes through Yosemite, Yellowstone, Banff, and more!

📍 Yosemite National Park

📍 Squamish, BC

📍 Banff, Alberta
